

PRODUCTS  
WORKING GROUP

The purpose of the Products Working Group is to provide energy conservation emphasis when procuring products on behalf of the U.S. Government by Federal agencies. Activities include all facets of the procurement process, including transportation of products, the kind of specifications used in the solicitation process, and the dissemination of information among agencies. The objectives are to identify opportunities for saving energy in the near term (less than one year) and to specify how these opportunities can be realized. The organizational entity, groups of people, or person responsible for directing, supervising, and insuring (through appropriate controls) the execution of programs will be identified. Energy savings and costs will be approximated. Existing administrative constraints impeding immediate action will also be identified and recommendations made to overcome these constraints.

CHAIRMAN

Roger Daniero  
Deputy Director, Office of Programs and  
Requirements  
General Services Administration  
Federal Supply Service

BUILDINGS  
WORKING GROUP

The purpose of the Buildings Working Group is to identify and suggest ways and means to increase the energy efficiency in new, existing and leased Federal buildings. Activities will include all facets of Federally-leased or owned buildings with emphasis on retrofitting operations and maintenance, and use of renewable energy resources. The goals will be to specify how these opportunities can be realized. The organizational entity, groups of people or person responsible for directing, supervising, and insuring (through appropriate controls) the execution of programs will be identified. Energy savings and costs will be approximated. Existing administrative constraints impeding immediate action will also be identified and recommendations made to overcome these constraints.
